

CMCA results of survey information priorities:

Firstly that the community is looking for is Freehold Title of their property, viability of the ski hill which is why we are there in the first place, continuation of the utilities that services the homes, as well as access to those utilities should some thing happen to CMR, better road access, better use of our taxes paid, easier access to mortgages if need be, and to be masters of our concerns and issues.

As a Committee, we held a meeting with the community to address issues and concerns.

We can communicate to you that the following items were central to the discussion:

1. Freehold title of lease lots
2. Basic infrastructure (water,gas,sewage,power)
3. Safe transportation to and from our community
4. Comparable services to other communities in the MD for the taxes paid.

CMR results of survey information priorities:

CMR is looking for the viability of the business, making money from future land sales by having a better avenue to do that, to not be the bylaw enforcement agency and to concentrate on the Ski Hill business, not all the other things that have come along with this development.
